Diamond Floor Paint

High quality water reducible coating which is ideally suited for use on patios, porches and other concrete or wooden floors, externally or internally.

*Diamond Acrylic Floor Paint may be applied to damp surface.

Application & Coverage

Use Nylon or Polyester brush or medium nap rollers for best results.

9-10m² per litre, 350-400 ft² per gallon depending on the porosity and texture of the surface.

Diamond Waterproofing

Waterproofing Compound
White resin-rich liquid rubber material waterproofs and insulates all roofing materials.

LVM Damp Proofer
Non-toxic flexible solution for waterproofing, and vapour proofing.

Waterproof Putty
Flexible water resistant compound used on a range of surfaces for sealing, waterproofing and as a flexible filler.

Our Approach

We specialize in made to order custom colours that can be modified to suit each client's unique requirements. Our, renowned, Trowel-on, a durable, weather resistant, lifetime *finish is available for purchase in 5 gallon quantities in customizable shades and grades.

Colours indicated in this chart are typically available at our main office and Montego Bay location. We offer custom colour mixing services for 5 gallon quantities which will take, on average, 5 - 7 working days.

*Finish refers to the trowel on plaster base not its colour which may be retouched periodically.
